

Chapter 11 Science and the Scriptures

While scores of theological scholars have been studying the literal meaning of biblical phrases and the historical facts mentioned therein, leading to an endless stream of interpretations, scientists have studied the scriptures and discovered scientific hidden meaning within them.

Along with our rapid scientific evolution, our understanding of ancient scriptures such as the Vedas and the Upanishads is growing. Now we're not only rediscovering the scientific significance of Eastern spirituality but also that of the Bible!

Fascinating facts about the Bible have surfaced that are often dismissed or ignored by the Roman Catholic Church because these findings do not fit in with their established dogmas.

However unlike theological discussions, scientific facts can neither be ignored nor can they be debated, they can either be proven right or wrong, there is no in between.

The Book Genesis

Maybe one of the least understood books of the ancient past is the book Genesis, the first book of the Holy Bible. In the last two decades scholars have discovered that this book encodes hidden knowledge that must have been put into it deliberately. Only now at the turn of the second millennium have we reached a level of scientific understanding that allows us to grasp the hidden knowledge in this book.

The biggest secret of creation is hidden in the first sentence of Genesis. In the original Hebrew version of the Bible, Genesis starts with the word

Be-resjiet meaning 'at first' or 'in principle'. It has been translated in modern versions of the Bible into 'in the beginning'.

Everyone knows the starting phrase of Genesis however few know that the whole essence of creation was put into that first word. We now know thanks to Stan Tenen's work into the origin and nature

of the Hebrew alphabet and Daniel Winter's additional research into the significance of the Golden Mean spiral, that the sacred Hebrew alphabet was designed with a clear intention to convey the very essence of creation and to teach later generations what the Be-resjiet, the principle of creation really is.

Independently Stan Tenen and Daniel Winter noticed that the characters of the Hebrew alphabet are projections of a 'special form' on the faces of a tetrahedron seen from different angles! However it was Daniel Winter who pointed out that this 'special form' is actually the Golden Mean or Phi spiral.

The Phi spiral describes the surface of the torus, the basic element of matter. Now if we put the Phi spiral inside a tetrahedron and then slowly revolve it around a pivot axis, and shine a light from behind the Phi spiral, all of the Hebrew characters will show up as the shadows on the inside face of the tetrahedron. Hence, the characters of the Hebrew alphabet are the projections of a Golden Mean spiral.

Stan Tenen called the 'special form' in the tetrahedron 'the flame letter in the tent'.

*Flame letter in the tent and the first verse of Genesis.
(Courtesy of Dan Winter, www.soulinvitation.com)*

Now isn't this amazing, the authors of Genesis quite deliberately wanted to convey this knowledge to future generations. All that was required was that we needed to evolve to a level of scientific understanding and sooner or later the significance of the scripture would be revealed. But what does it mean?

(1)

According to Daniel Winter, the angles needed to project the Phi spiral onto the face of the tetrahedron and create the Hebrew alphabet, are the same angles we need to rotate the doughnut torus such that they can be nested into each other according to the symmetry of the Platonic solids. This is exactly the recipe for constructing matter from torus shapes as described in the chapter 6 'Ether Vibrations', paragraph 'Implosion Physics'!

Even more remarkable is the fact that when the actual Hebrew character is pronounced out loud, it will take on the shape of the character. Both Stan Tenen and Dr. Hans Jenny (Cymatics) independently indicated this fact. Hans Jenny recorded the vocal expression of the letter on a plate of sand. The vibrations in the voice pronouncing the Hebrew letter caused the sand grains to take on the actual shape of the Hebrew character!

Obviously this hi-tech knowledge has been deliberately preserved in the Bible for future generations to discover. The Hebrew alphabet is a manual for creating matter; it is a sacred language

that has been intentionally designed. The third book of the Kabbalah the 'Sephir Yitzirah' mentions the story of God taking letters from the alphabet to create the world. For centuries we have ridiculed this idea and believed it to be a myth, but only now that we have reached scientific maturity we marvel at these words, as indeed the Hebrew alphabet seems to be the blueprint of matter.

We can now also make sense out of the first sentence in the gospel of John that states:

John 1-1 "In the beginning was the Word, and the Word was with God, and the Word was God.

2 He was in the beginning with God;

3 All things were made through him, and without him was not anything made that was made".

Given the fact that basic keys for the construction of matter are given in the first sentence of Genesis, we may now have another look at the mythical story of Adam and Eve contained within Genesis. Let's look at the basic building blocks of matter once more:

Left, the double vortex creating the torus on the right!

It takes some imagination but have a look at the double vortex on the left, doesn't it look like a tree? The bottom vortex are the roots, the top is the foliage. This is the Tree of Knowledge of Good and Evil in the Garden of Eden. If we have a look to the right picture it is rather easy to see the apple, the torus is an apple shape. The snake that seduced Eve to eat the apple from the tree is the Phi spiral that perfectly describes the torus.

The story of Adam and Eve, could well be references to the way the material world is constructed from the aether. The fall from paradise started when from the Oneness of the Creator, his eternal

consciousness, the aether, the first torus shape was created. The first step in creation was at the same time the separation from Oneness. The fall from paradise could be explained as the separation from Oneness into the illusionary physical world of seemingly separate parts.

(2)

If the author of the book of Genesis possessed a thorough scientific understanding, the question is where did he get this knowledge?

The Book Exodus

A very interesting fact is that archaeologist Howard Middleton-Jones claims he has found the entrance to the Ark of the Covenant, the shrine that contains the stone tablets inscribed with the Ten Commandments given to Moses by God. According to Middleton-Jones, the entrance is to be found in the Great Pyramid at the Giza plateau.

The entrance to the Ark of Covenant supposedly faces the south end wall of the Grand Gallery of the Great Pyramid. In his book 'Giza-Genesis, the best kept secrets' he gives exact details on how the door to the secret hidden passage may be opened.

He discovered this entrance by studying the biblical book Exodus in which God gives detailed instructions to Moses for the constructions of the Ark of the Covenant as the storage place for the Ten Commandments. He discovered that in minute detail the construction and materials used for the Grand Gallery of the Great Pyramid were actually being described in the book of Exodus! Howard Middleton-Jones however does not believe that the Ark of Covenant contains the Ten Commandments, he has come to the conclusion that it must be a crystal of Atlantean origin placed deep beneath the Giza plateau for the stabilization of the Earth grid.

(3)

The Book of Numbers

Many believe that the author of the books Genesis, Exodus and the Book of Numbers is actually Moses. The Book of Numbers deals about the forty-year time span after the exodus of the Israelites from Egypt. There are an awful lot of numbers mentioned in the Book of Numbers, hence its name. The numbers seem to have relevance.

According to physician and America's leading herbalist Dr. Joseph S. Puleo, he was inspired during some mystical experiences to study the Book of Numbers for healing frequencies. As strange as this may sound, eventually he did find 6 sound frequencies in the Book of Numbers chapter 7, verses 12-89!

The frequencies found are 396 Hz, 417 Hz, 528 Hz, 639 Hz, 741 Hz, and 852 Hz. These frequencies are the frequencies of the old Solfeggio scale. It was used in Gregorian and Sanskrit chants. The syllables used to denote the tones of this scale are:

Ut-Re-Mi-Fa-Sol-La, they are taken from the medieval song Ut Quent Laxis, a Gregorian chant written for John the Baptist.

Ut queant laxis
Resonare fibris
Mira gestorum
Famuli tuorum
Solve polluti
Labii reatum
Sancte Iohannes

Translation: *In order that the slaves might resonate (resound) the miracles (wonders) of your creations with loosened (expanded) vocal chords. Wash the guilt from (our) polluted lips Saint John.*

The text in Ut Quent Laxis seems to suggest that these notes open up a channel of communication with the Divine.

In a vision Dr. Joseph S. Puleo was shown to use the number reduction methodology of Pythagoras on the numbers in the text. It is a very simple reduction method turning big numbers into a single digit. The values of all digits in the number are added up. When after the first addition the number still contains more than one digit, the process is repeated. Here's an example:

456 reduces to $4+5+6 = 15$, that next reduces to $1 + 5 = 6$. So the number 456 reduces eventually to the single digit 6.

Joseph Puleo found repetitions of a single issue or subject in the Book of Numbers that was brought up. The first thing he found was that of the frequent mentioning of the number of the day, the first day, the second day, the third day etc. The first day was referenced in verse 12, the second day was mentioned in verse 18 and the third day in verse 24. The last reference to a day was found in verse 78. All day references were found in verses starting at verse 12 with an increment of 6.

The Pythagorean reduction of these verse numbers is:

$$12 = 1 + 2 = 3$$

$$18 = 1 + 8 = 9$$

$$24 = 2 + 4 = 6$$

$$30 = 3 + 0 = 3$$

$$36 = 3 + 6 = 9$$

$$42 = 4 + 2 = 6$$

Do you see the repetition now of 396, 396 etc this keeps going on until verse 78 is reached! This is how the first frequency corresponding to the Ut tone was found.

The other frequencies were found using other repetitive issues found in the text. Surprisingly all frequencies that were found this way, matched up with the frequencies of the Solfeggio scale.

The Solfeggio scale after a while was forbidden by the church and changed into our current popular Tempered scale. Ut was changed into Do and its frequency changed, also the seventh Ti note was added. However, the total harmony of the original scale was gone.

(4)

It is now believed that the frequencies found by Puleo have healing properties. The frequency of 528 Hz supposedly has healing effects on DNA. The frequency seems to influence the water molecules that surround the DNA helix.

Glen Rein of the Quantum Biology Research Lab in New York has performed experiments with in vitro DNA that was exposed to different recordings of musical styles. He used a technique to

convert the music into audio scalar waves. He used two phase opposite sound sources from the same music to self-cancel the waves and create scalar audio waves. In the experiment a CD player, an amplifier and a spiral like self-cancelling coil were used. Four styles of music were played to test tubes containing in vitro DNA. The absorption of UV light of the DNA test tube samples was measured after an hour.

Gregorian chants had caused a 5 to 9.1 % increase in the absorption of UV light due to the unwinding of the DNA helix. Sanskrit chanting caused a similar 5.8% to 8.2% effect. Rock (0-1%) and classical music (0-1.1%) had little or no effect. Glen Rein finally concluded that the audible sound waves of the Solfeggio scale can cause resonance in DNA and can have healing effects.
(5)

The question is who put these frequencies into the Book of Numbers? If Moses was the author of this book, he may have gotten this knowledge from the Egyptians. It remains a mystery, but the fact is that musical frequencies are mentioned in the Book of Numbers that have scientifically measurable effects on DNA. It has been suggested that these frequencies have DNA healing properties.

Gematria

Gematria is an ancient occult science that studies the Bible in a different way. It tries to find meaning in the Hebrew text by studying the numerical values of the Hebrew letters and words. In Hebrew every character has a unique value, much like the binary ASCII code in modern computers that is used to represent characters. The values of the characters in a word can be added up to the numerical value of the word, words can be added up to the value of sentences etc.

There are a few direct references to the Great Pyramid in the Bible. One of them is in the book Isaiah:

Isaiah 19:19-20 “At that time there will be an altar for the LORD in the middle of Egypt and a monument to the LORD at the border of Egypt. This will be a sign and a witness to the LORD All-Powerful in the land of Egypt. When the people cry to the LORD for help, he

will send someone to save and defend them. He will rescue them from those who hurt them”.

The altar in the middle of Egypt and the monument at the border of Egypt is most likely a reference to the Great Pyramid residing near the Nile delta. The Great Pyramid is the only monument that is located in the center of old Egypt and is on the border (of the Nile) at the same time.

If the official Hebrew text of the same verses of Isaiah 19:19-20 are taken, we discover a very interesting fact. When the Gematria value is taken from these verses of Isaiah they add up to the value 5449. In inches this is the exact height of the Great Pyramid!

Remember that the Great Pyramid was covered by 144.000 polished casing stones that made it shine like a huge lighthouse in the desert. The Egyptians called the pyramid ‘Ta Khut’ which translates into ‘The Light’. The harmonic value for the speed of light happens to be 144.000 arcs per grid second as was discovered by Bruce Cathie who recalculated the speed of light relative to the Earth grid. Is it pure ‘coincidence’ then that the Gematria value for ‘light’ equates to 144?

Again we find clues that the authors of the Bible must have had profound knowledge of the Great Pyramid and most likely also about the speed of light.

This is knowledge that the ancients should not have possessed at the time the Bible was written at least not if we still believe in a linear evolution of humanity with our current civilization at the pinnacle of evolution on this planet!

(6)

So what we see here is that the harmonic grid speed of light corresponds with the Gematria value 144 for light! This seems to be no coincidence. It may be that the ancient authors of the Bible knew about the harmonic grid speed of light and designed the Hebrew word for light such that it represents the value 144! If they were able to design the whole Hebrew alphabet from the projections of the Phi spiral in a tetrahedron, then why would they not have been able to add Gematria significance to the words as well?

(7)

In this section we just gave two examples of the application of Gematria and its deeper significance that rises above the literal Biblical text. Gematria raises questions about who actually wrote the Bible? How did the authors of the Bible know the measurements of the Great Pyramid and is it possible that they indeed knew the speed of light? Did the authors of the Old Testament add a deeper level of significance to the literal Hebrew words in the Bible, tempting us most of all to read between the lines? Perhaps the Old Testament was meant to convey and conceal an ancient science that we're just starting to rediscover?

The Bible Code

A lot of upheaval has been caused by the revelation of the alleged Bible codes that were discovered within the Old Testament. In 1958 a Rabbi discovered some unusual patterns encoded within the book Genesis. He believed there were secret messages hidden within the Bible. In 1988 mathematician Eliyahu Ripps of the Hebrew University took the claims of the old Rabbi seriously and incorporated the complete text of the Old Testament into a computer. He and his team developed an analysis method to scan the whole text of the Bible looking for hidden Torah codes. The simple algorithm they had developed is called Equidistant Letter Sequencing (ELS). It boils down to first establishing a keyword that we want to find within the text. Next the computer starts looking for the first occurrence of the first letter in the text. When found the second letter is searched for. Now the distance between first and second letter in characters is determined, let's say the two letters occur within a distance of 50 characters. Now the rest of the Bible text is scanned but this time only the characters with a 50-character interval are scanned to search for the next characters in the initial word. When the whole word is found, the scanning continues to find other possible related words.

The Bible Code was introduced to the public at large when investigative reporter Michael Drosnin entered the scene and wrote the by now famous book 'The Bible Code.' The Bible Code revealed a lot of historical names, places and facts within the Old Testament, the assassinations of Lincoln, Kennedy, Ghandi, references to the Oklahoma bombing, World War II, the fall of the Iron Curtain. The Bible Code took on prophetic qualities when

Droshin warned Israeli Prime Minister Yitzhak Rabin one year before he was assassinated, that the Bible Code predicted his murder. Not only was the exact date of the incident encoded but also the name of his murderer! A year later Rabin was murdered on the exact date mentioned in the Bible code and by the man mentioned therein.

Now this is an astonishing fact that cannot easily be explained! It attracted the interest of the military defence of the United States who seriously studied the subject of the supposed Bible Codes.

However other people claim that hidden codes can be found in any book! To prove this fact Brendan McKay of the Australia National University took a page from the book 'Moby Dick' and proved that the following words could be extracted using the ELS algorithm: Princess Diana, Royal, Dodi, Henri Paul, Mortal in these jaws of death.

For many it is absolute proof that the Bible Codes are just random and bear no inherent meaning. However Droshin defends these claims by saying that the words extracted by ELS were all found very close to each other in the text and that the chances of such occurring were against odds. This has been confirmed by a statistical study that has been performed and published in 'Statistical Science'. He also said that 'Moby Dick' did not predict future events!

Theomatics

While the debate continues whether or not the Bible Code is authentic, a totally different kind of Bible code has been discovered that according to the discoverers is far more interesting and can be mathematically proven without a shadow of a doubt. Theomatics is based on the ancient occult science of Gematria but takes it a bit further!

The discoverers of Theomatics claim that it proves that God's own watermark, His own autograph was put into the Bible!

This is what they write about their own discovery, quote:

'It is absolutely, completely and totally impossible to mathematically disprove Theomatics. The overall validity of this discovery - the fact that God did it - is unimpeachable. Theomatics will never be disproved. In fact no one will come close to it'.

Wow, these people are either very arrogant or they are so very sure about themselves that they have truly stumbled onto something very real! Let's have a closer look.

Theomatics is a combination of the words Theo, the Greek word for God, and mathematics. The basis for Theomatics is the ancient Gematria.

Theomatics was discovered like the 'Bible Code' by feeding the text of the most original Greek version of the New Testament into a computer. Now in the Greek New Testament the chapters are indicated with letters just like the Roman letters represent numerals. This way they could derive the numerical value of the corresponding Greek letter, the ASCII code (number representing a character used in computers) so to speak of the Greek letter. They discovered that not only the letters represent a value but also that all words within the text have a unique number. It is calculated by adding up the values of the characters that make up the word.

A alpha	1	I iota	10	P rho	100
B beta	2	K kappa	20	Σ sigma	200
Γ gamma	3	Λ lambda	30	T tau	300
Δ delta	4	M mu	40	Υ upsilon	400
E epsilon	5	N nu	50	Φ phi	500
F digamma	6	Ξ xi	60	X khi	600
Z zeta	7	O omicron	70	Ψ psi	700
H eta	8	Π pi	80	Ω omega	800
Θ theta	9	Υ koppa	90	Ϛ sampi	900

Gematria values of the Greek alphabet

For instance the word Jesus in Greek has the value of 888.

$$Iesous (\text{Ἰησους}) = I (10) + e (8) + s (200) + o (70) + u (400) + s (200) = 888$$

Likewise the value of phrases and sentences can be calculated. So far so good, we're still on the familiar terrain of Gematria.

However they also discovered that numbers mentioned in the text are keys, indicators to the words they refer to. Examples are: Adam lived 930 years (930 is a key), Abraham had 318 servants, Jesus had healed a man of 38 years, etc, etc. Now all of these numbers are key numbers in Theomatics, they bear a relation with the very words that they refer to!

Now the impossible was proven:

All words within the Bible, each having a unique value, when referenced in a sentence or phrase, the value of the phrase or sentence is a multiple of the value of the word itself.

They found NO exceptions to this rule!

Here is an example:

The value for Jesus is 888. However the birth of Jesus has a value of 111 ('Jesus' is a multiple 8 of 'the birth of Jesus').

Now within the Bible every reference without exception to the 'birth of Jesus' will be a multiple of 111:

(Now remember that the phrases hereafter are originally in Greek!)

Jesus	111 x 8	(Mathew 1:16)
Christ	111 x 12	(Mathew 1:16)
And Jacob begat Joseph the Husband of Mary, of whom was born Jesus, who is called Christ	111 x 66	(Mathew 1:16)
Her begotten	111 x 8	(Mathew 1:20)
Behold, a virgin shall conceive and bear a son	111 x 27	(Mathew 1:23)
And she will bear a son	111 x 11	(Mathew 1:21)
She bore a son and called his name	111 x 24	(Mathew 1:25)
The firstborn in the world	111 x	(Hebrews 1:6)

	29	
She bore the son the firstborn	111 x 25	(Luke 2:7)
She bore a son and called his name	111 x 24	(Mathew 1:25)
The babe in the womb	111 x 13	(Luke 1:41)
She bore the son the firstborn	111 x 25	(Luke 2:7)
This child	111 x 26	(Luke 2:17)
He was conceived	111 x 19	(Luke 1:41)
That whenever she bears the child of her	111 x 20	(Revelation 12:4)

Now by no means can these occurrences in the Bible be labelled coincidental. Theomatics shows that the Bible must have been written using a predetermined mathematical design. The discoverers stress that it only works for the Bible and for no other book and only with the exact values assigned to the Greek letters.

Tests were conducted to see if another random assignment of numbers to the Greek alphabet could also give the same results, however all tests were negative.

Now the astonishing fact of the matter is that if Theomatics can be validated that not only is it proven that the Bible is indeed constructed following a mathematical design but also that the Greek language that existed before the New Testament was written, must have been designed using the very same principles!

In addition, since the New Testament consists of a multiple of books written by different authors who wrote their books over time in different eras, all of the words and phrases chosen by these authors should have been orchestrated on purpose following a unified and unique principle!

This is why the adherers of Theomatics believe that only a Divine force could have arranged for these circumstances to happen!

Unfortunately Theomatics is not getting the attention the 'Bible Code' has had, a thorough investigation by scientific standards

could prove or disprove these bold claims made for Theomatics.
(9)

Sacred geometry

Theomatics claims to prove that the numerical mathematical principle of Gematria was applied consistently in the text of the New Testament. This is not where the story of Gematria and the puzzling application of it in the Bible ends.

Researcher Daniel Gleason claims that we have missed the whole point about Gematria in the New Testament. According to Daniel Gleason, Gematria is really about sacred geometry that was secretly hidden in the Gospels!

The Gematria values that we find in the Gospels are actually the lengths, diameters and circumferences of geometrical forms that can be derived from the symbolic texts in the Gospels of the New Testament. Much of his work focuses in on the Gospel of Mark and he comes up with a diagram for every verse in the Gospel of Mark based on principles of sacred geometry.

All of his diagrams symbolize and focus on the importance of the resurrection of Jesus. After Jesus' crucifixion and burial, Jesus resurrected from his grave and the sacred geometry of Daniel Gleason uses his resurrection, the raised Jesus, as a central theme in all of his diagrams.

In the previous section we showed that the Gematria value for Jesus is 888. The value for the risen Jesus however is 8880. All of Gleason's diagrams show a circle with a circumference of 8880 units, the value and symbol of the 'risen Jesus'. Enclosed within this circle, for every biblical verse he shows how sacred geometrical patterns can be drawn inside the circle that correspond with the Gematria values of the words and or phrases mentioned in the verse.

Since Daniel Gleason's work is way too elaborate to be summarised in just a few words just in this book, without doing him justice. we simply present one example to illustrate his work. This example is fascinating since again it reveals the importance of the 'Star of David' or the interlaced tetrahedron as the symbol of the resurrection of Jesus:

This example is from **John 20:31** where it says:

*But these things have-been-written that you might-have-Faith that **Jesus** is the **Christ** ... the **Son of God** ... and that having-Faith ... you may have **Life** ... in the Name of him. (John 20:31)*

*And **John 14:6***

*Jesus says to-him ... I am The Way and The Truth and **The Life** ... no-one comes to the Father except through me. (John 14:6)*

Now consider the following Gematria values in Greek:

Life is 815. (Side of the tetrahedron)

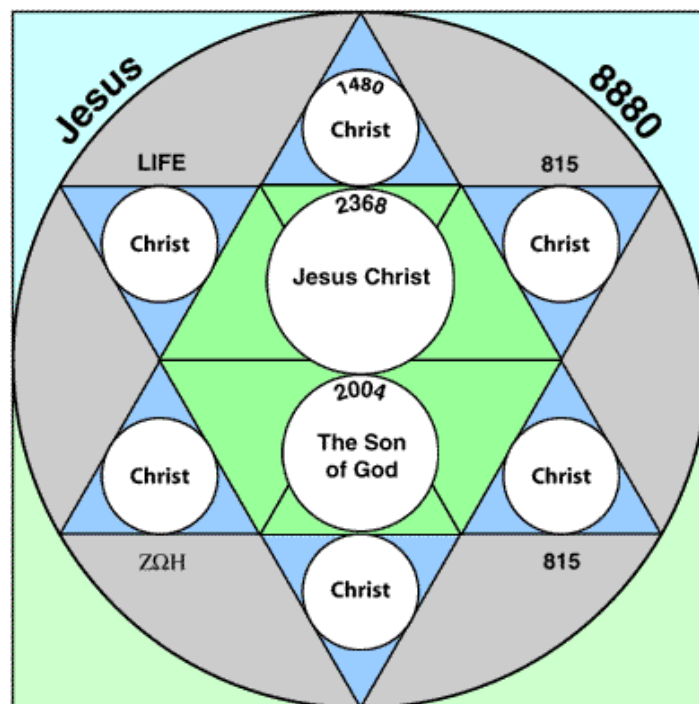

Christ or Christos in Greek is 1480 (Circumference of a circle)

Jesus Christ with a Gematrian value of 2368 (Circumference of a circle)

The Son of God 2004. (Circumference of a circle)

The Risen Jesus has a value of 8880. (Circumference of the outer circle)

Now look how neatly all of these values are represented in Gleason's sacred geometry diagram symbolizing the Star of David.

Sacred geometry symbolism of the Risen Jesus in the Star of David.

(Courtesy of Daniel Gleason, www.jesus8880.com)

Although the sceptical reader may call it a fabrication of numbers, in my opinion these numbers and their geometrical representation are not a coincidence. The fact is that the Star of David, the interlaced tetrahedron plays a significant role as a symbol throughout history and it shows up in many forms. In all cases it is related to the Merkaba, the vehicle for ascension. Also Jesus demonstrated his ascension with his resurrection from the dead. So we now find the same symbol of ascension, the Merkaba also in the New Testament hidden in the sacred geometry of Gematria. (10)

Recapitulation

Many people have always claimed that the Bible contains all the knowledge there is to know. Well for a fact there is more knowledge hidden behind the plain words and sentences that have been debated for centuries. While Biblical scholars still fight about the meaning of the biblical words leading to ever more interpretations, science is revealing a significance that allows for only one interpretation.

It is utterly impossible that 'primitive' ancients could have written the Bible. The knowledge hidden within the Bible that we have just started to uncover is stunning. It reveals that somehow the know-how of a highly developed civilisation was preserved along with the Bible text. The Hebrew language, the original language of the Old Testament must have been designed by a culture with a profound understanding of vibrations in physics. Gematria adds another level of knowledge to the words of the Bible. Although the discoverers of Theomatics are absolutely convinced that God wrote the Bible himself, what can be taken as a fact is that a mathematical principle was used that can not easily be explained.

Daniel Gleason's work may prove that all of the Gematria mysticism really boils down to sacred geometry. Now how do we explain all this?

Let's for a moment assume that the Hebrew and Greek languages have been designed on purpose by a superior civilisation, that walked the face of the Earth before we did, to conceal sacred information about aether vibrations and how they create reality. The designers of these alphabets and languages could be the

survivors of Atlantis that founded new cultures after the destruction of their continent. Hermes Trismegistus (Toth the Atlantean) the builder of the Great Pyramid according to Edgar Cayce and other sources, supposedly is one of the founding fathers of these cultures. It could explain why Theomatics works on the level of individual words. However when it comes to phrases and whole sentences it becomes very unlikely that all authors of the books that make up both the Old and the New Testament knew about and applied the Theomatics principle.

The only reasonable explanation would be that all the authors of the Bible were initiates to a higher wisdom and knowledge and these authors universally applied mathematical principles of Gematria and or sacred geometry to encrypt this wisdom in the Bible such that it could be conveyed to future generations.
